Other Costs Not Included:				<b>NOTE</b>																									
Installation Labor Est. 10 hrs.				X(1) - ALL 50 SERIES COMBINES: In order to determine the correct pricing and required JD parts, it is necessary to physically look at the circuit board for AHC/HHR to see if it is part number AH172613, AH206189, AH217993 or AH220605. The circuit board is located in the central electronics modular next to the door of the cab. If your 50 series combine <u>does not</u> have the correct circuit board, then that requires the purchase of the AH220605 circuit board, and the total price is correct. If your 50 series combine <u>does</u> have the AH172613, AH206189, AH217993 or AH220605 circuit board then subtract \$740.00 from the total and do not purchase the circuit board. With the basic LT-100 installation the in-cab header angle display will not function. This display can be activated with the installation of additional JD parts. Contact
