# Model 2600 Leveling System

# Model 2600 Leveling System

## 1 **GENERAL INFORMATION**

### **SERIAL NUMBER LOCATION**

### **TEXT FORMAT AND ILLUSTRATIONS**

The arrangement of this parts catalog is for easy identification of parts. All parts are illustrated in exploded views in proper relation to each other. Reference numbers used in the illustrations refer to line numbers in the part lists for each grouping. The part lists reference number, part number, part description and the quantity required per leveling system. Some part lists also include the page numbers of additional part breakdown information and reference the location of the part on the combine.

### **ABBREVIATIONS**

**SN** "Serial Number" The four digits shown in the SN column refer to the last four digits in the Hillco serial number. Each Model 2600 system uses the following format: 2600-XXXX (sequential numbers).

**ASM** "Assembly" refers to a permanent grouping of parts not sold separately.

**NSS** "Not Sold Separately" refers to items depicted in illustrations that are not available to be purchased.

**NS** "Not Shown" refers to a part that is not depicted in the illustration.

### **RIGHT AND LEFT IDENTIFICATION**

The reference to right-hand and left-hand in this catalog is identified by the operator standing at the rear of the machine looking toward the front of the machine (in normal forward travel).

### **CATALOG REVISIONS AND SUPPLEMENTS**

Changes to the product may make it necessary to revise or add pages to this catalog. A cover sheet will list all pages released in a revision or supplement. All revised and new pages must be put into the parts catalog as soon as they are received.

### **PARTS ORDERS**

Orders must specify product model, serial number, correct part number, complete description, quantity required, method of shipment, shipping address, and billing address.

Model 2600 Leveling System

**2 TRANSITION**
